- 1) Represents our core portfolio, which excludes certain investments that fall outside of our typical borrower profile. EBITDA is defined as earnings before interest, tax, depreciation and amortization. This calculation may vary depending on the portfolio company
- 2) Return on Average Equity is calculated using weighted average equity. Weighted average equity is calculated by starting with NAV at the beginning of the period, adjusting daily for equity issuances and adjusting on the last day of the period for that period's net income and dividends payable
- 3) Deferred Financing Costs total \$11.0mm at 12/31/16, \$14.1mm at 3/31/17, \$13.3mm at 6/30/17, \$12.6mm at 9/30/17, and \$11.8mm at 12/31/17
- 4) Pro-forma for unsettled trades of \$0 at 12/31/16, -\$7mm at 3/31/17, \$0 at 6/30/17, \$0 at 9/30/17, and \$0 at 12/31/2017

- 6) Total yield on investments is calculated based on the interest rate and the accretion of OID, exclusive of investments on non-accrual status
- 7) Interest from investments – interest and dividend income includes accrued interest and dividend income, amortization of purchase discounts (premiums) and certain fees, and accelerated amortization of upfront fees from scheduled principal payments
- 8) Interest from investments – other fees includes prepayment fees and accelerated amortization of upfront fees from unscheduled paydowns

- 13) Interest rate on debt outstanding includes the swap-adjusted interest expense related to our Convertible Notes
- 14) In connection with the note offerings, the Company entered into interest rate swaps to continue to align the interest rates of our liabilities with our investment portfolio, which consists of predominately floating rate loans. As a result of the swaps, our effective interest rate on the 2019 and 2022 convertible notes and 2023 notes was three-month LIBOR plus 286.0 basis points, 237.2 basis points, and 199.4 basis points respectively, which reflects the current terms
- 15) Weighted by amortized cost of debt investments. Investments are financed by debt and permanent equity capital. This analysis assumes longer-dated investments are currently funded by permanent equity capital (55% of investments) and the remaining (shorter-dated) investments (45% of investments) are currently funded by debt financing. Investments for purposes of this analysis include unfunded commitments, and permanent equity capital is defined as 12/31/17 net assets
- 16) Convertible debt treated as floating rate due to interest rate swap TSLX entered into to swap fixed notes payments for floating rate payments
